### **Samfunns- og næringslivsforskning AS**

- er et selskap i NHH-miljøet med oppgave å initiere, organisere og utføre eksterntfinansiert forskning. Norges Handelshøyskole og Stiftelsen SNF er aksjonærer. Virksomheten drives med basis i egen stab og fagmiljøene ved NHH.

SNF er ett av Norges ledende forskningsmiljø innen anvendt økonomisk-administrativ forskning, og har gode samarbeidsrelasjoner til andre forskningsmiljøer i Norge og utlandet. SNF utfører forskning og forskningsbaserte utredninger for sentrale beslutningstakere i privat og offentlig sektor. Forskingen organiseres i programmer og prosjekter av langsiktig og mer kort-siktig karakter. Alle publikasjoner er offentlig tilgjengelig.

### **Institute for Research in Economics and Business Administration**

*- is a company within the NHH group. Its objective is to initiate, organize and conduct externally financed research. The company shareholders are the Norwegian School of Economics (NHH) and the SNF Foundation. Research is carried out by SNF's own staff as well as faculty members at NHH.*

*SNF is one of Norway's leading research environment within applied economic administrative research. It has excellent working relations with other research environments in Norway as well as abroad. SNF conducts research and prepares research-based reports for major decision-makers both in the private and the public sector. Research is organized in programmes and projects on a long-term as well as a short-term basis. All our publications are publicly available.*

This study develops and uses a successive oligopoly model, with an unobservable non-linear tariff between upstream and downstream firms, to analyze the possible anti-competitive effects of an upstream merger. We find that an upstream merger may lead to higher average prices paid by downstream firms, but that there is no change in the prices paid by consumers. The model is tested empirically on data for an upstream merger in the Norwegian food sector (specifically, the market for eggs). Consistent with the theoretical predictions of the model, we find that the merger had no effect on consumer prices, but led to higher average prices from the downstream to the upstream firm.
